## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments, filed on 06/06/2005, with respect to the rejection(s) of claim(s) 1-12, 15-22, 24-42, 44-84, and 86-89 under 35 USC § 102(a) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn.
2. The indicated allowability of claims 80-83 are withdrawn in view of the newly discovered reference(s) to US 6,392,570. Rejections based on the newly cited reference(s) follow.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

4. Claims 80-83 are rejected under 35 U.S.C. 102(e) as being anticipated by Bucht (US 6,392,570).
  - With regard claim 80, Bucht discloses a method of decoding a portion of one symbol comprising the steps of: locating the one symbol (Fig.2 element [0..5]); decoding the portion of the one symbol such that the decoding of the portion takes place within a first time period (Fig.2 elements 31-35 and column 6 line 1 –

column 8 line 62); and decoding the entire symbol such that the decoding of the entire one symbol takes longer than the first time period (Fig.2 elements 36 and 37 and column 8 line 63 – column 11 line 31). It is inherent that the time period for decoding portion of the symbol is shorter than that of decoding entire symbol.

- With regard claim 81, Bucht further discloses wherein the entire symbol is the same symbol as the one symbol (Fig.2 elements 41 and 42 and column 6 lines 1-32).
- With regard claim 82, Bucht further discloses wherein the entire symbol is different than the one symbol (Fig.2 elements 36, 42, and elements 31,32, 33 output, elements 37, 42, and element 35 output).
- With regard claim 83, Bucht further discloses wherein the entire symbol and the one symbol are modulated with the same modulation type (Fig.2 elements 41, 42, and column 6 lines 20-31). Since the entire encoded word comprises bits [0...9], each of portion of the entire encoded word ([0..5] and [6..9]) is inherent to be the same modulated type as that of entire encoded word [0...9].

### ***Allowable Subject Matter***

5. Claims 1-12, 15-22, 24-42, 44-79, 84, and 86-89 are allowed.

### ***Conclusion***

6. Reference(s) US 2002/009450, US 6,549,561, and 5,812,523 are cited because they are put pertinent to the OFDM receiver. However, none of references teach detailed connection as recited in claim.
